siffron® Introduces New No-Contact Thermometers

siffron®, a leader in retail merchandising, is introducing a new, easy-to-use, No-Contact Thermometer to help retailers monitor the health and wellness of their associates and reduce the chances of transmission.

No-Contact Thermometers are designed for simple, one-button operation to quickly and accurately take temperatures. The lightweight, handheld devices also feature an internal memory that stores data for up to 25 readings (optional alarm available if fever is detected).

- Features 'Forehead' and 'Surface' modes
- Operating Range 50 to 104°F/10 to 40°C
- Certifications: WEEE, CE, RoHS, FDA
- Battery Powered

For more information on No-Contact thermometers, please check out the [No-Contact Thermometer](#) section on siffron's website.

About siffron

For over 60 years, siffron has been a leader in the retail display and loss prevention industry, providing solutions designed to increase sales, improve category management, limit shrink and reduce labor at the point of sale. These products include custom product displays; merchandising and loss prevention systems; label, sign and literature holders; product merchandisers and display components; as well as fresh area merchandising products, supplies and backroom organization solutions. siffron offers start-to-finish solution delivery, including consultation, design, prototyping, production, fulfillment and purchase consolidation.
