

# Power-Zone® Kwik-Set™ Pusher System (for Frozen)

## Features and Benefits

- ◆ Designed for freezer section -18°C (0°F) or lower
- ◆ Self-facing pusher system provides maintenance-free shelf organization
- ◆ Dividers and Tracks engage and disengage easily for trouble-free installations and quick set changes
- ◆ Components can ship pre-assembled for box-to-shelf installation to minimize labor, or in bulk by category to minimize freight
- ◆ Features 1.75" H front lens
- ◆ Available in black or white

## Maintenance-free shelf organization in freezers

The Kwik-Set™ product facing system keeps items organized and faced on shelves, which reduces labor costs. Kwik-Set has traditionally been implemented throughout center-store areas of retail, as well as some cooler applications. Kwik-Set for frozen products takes innovative product facing to the freezers.

Power Zone® Kwik-Set™ Self Facing System for Freezers provides industry-best facing for frozen foods and packaging. Kwik-Set for Freezers is designed to withstand temperatures at -18° C (0° F) or lower. Kwik-Set for Freezers keeps product faced to the front of the shelf, making it easier for customers to view and find products without needing to open the freezer doors, saving energy costs.

## Specifications

Item No.	Description	Dimensions	Color
4124220826	PZ KS Frozen Center Divider Assy; Ratcheting	4.375"H x 22"D	Black
4124220825	PZ KS Frozen Center Divider Assy; Ratcheting	4.375"H x 20"D	Black
