

Pallet Floor Guard

Bottom of Pallet

Features and Benefits

- ◆ Raises pallet .33" to protect floors from rough wood and protruding nails.
- ◆ Allows lightweight pallets and displays to be shifted slightly on the floor without scratching.
- ◆ Can be attached with .75" L flat head wood screws or with .56" L heavy-duty staples
- ◆ Integrated glue holes allow Guards to be affixed to other display materials.

Protect floors from unsightly scratches

Ensure floors are protected from the rough splinters and protruding nails of wooden pallets with the Pallet Floor Guard from siffron.

Made of durable plastic, the Guards offer a cost-effective enhancement to pallets and other displays. In addition, the Guards allow lightweight pallets and displays to be shifted slightly without the use of a pallet jack and without scratching the floor.

The recommended use of this product is to utilize a minimum of four guards for each pallet, secured with a .75" long flat head wood screw (#8) or three .56" long heavy-duty staples (#6). For heavy loads up to 5,000 pounds and for larger pallets, an additional guard should be added to the center of the pallet. Fasteners are not included.
