

Roller Track Pullout Shelf

Features and Benefits

- ◆ Shelf extends out using an easy two-handed release system
- ◆ 18" extension makes it easier to load product
- ◆ Perfect for first in, first out merchandising
- ◆ Shelves available in multiple depths for most major refrigerated and center store fixtures
- ◆ Integrated c-channel for price labels
- ◆ Designed at optimum angle for self-facing products

Roller Track Pullout Shelf - Better Stock Rotation and Organization

Reduce safety risks, organize merchandise, and improve stock rotation in store categories for grocery and convenience stores using Roller Track – Pullout Shelf. Standard shelving and display fixtures require multiple labor-intensive shelf resets.

Roller Track Pullout uses a unique frame design that allows for a smooth actuation using a double handle system for easy release when extending the shelf. The frame mounts directly into uprights, minimizing lost vertical space. Easy to install and even easier to use, Roller Track Pullout reduces risk and improves restocking efficiency by ensuring First-In, First-Out rotation of product.

To engage, press buttons on both sides of Roller Track shelf which releases the locking mechanism and allows for the Roller Track to extend out (18") for easy merchandise restocking, allowing newest product to be loaded into the back for FIFO rotation.

Specifications

Item No.	Description	Dimensions	Color
4709300400	Roller Track Pull-Out Floating Frame	48"W x 23.5"D x 6.9"H	White
