Merchandise like a PRO!

NEXT PRO™ removes the obstacles to product facing

Bearing Pusher

Patented bearing pusher works by eliminating friction that occurs when pushers encounter contaminants

Elevate your merchandising game with the NEXT PRO™ SaladRack™, engineered for maximum efficiency and ease of use. Its innovative pre-measured, locking width settings ensure that your planograms remain intact, even during high-traffic stocking and shopping hours. Designed with the fast-paced demands of retail in mind, the SaladRack™ keeps your produce display perfectly aligned and visually appealing, so customers always experience a fresh, inviting selection.

The NEXT PRO™ SaladRack™ offers deeper tray sizes, enabling you to pack more produce and reduce the risk of stockouts. By installing directly onto crossbars, grids or shelves, these racks not only compact your retail space but also enhance lateral facings, making the most of every inch. Gain vertical space and optimize pack-out with deep pushers, while the patented paddle pusher with integrated ball bearings ensures smooth, consistent product facing in even the toughest store environments

The SaladRack™ features pull-out racks that make stock rotation faster and more efficient, saving you valuable time during restocking. Its user-friendly design ensures ease of installation and maintenance, empowering your staff to keep shelves neat and fully stocked with minimal effort. With the NEXT PRO™ SaladRack™, you're not just organizing your produce aisle—you're transforming it into a high-performing, customer-friendly retail space.

NEXTPRO™ SaladRack™

Shelf Tray

Description:

Front facing shelf system for perishables

Dimensions:

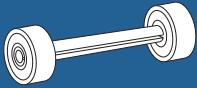

Fits virtually all refrigerated cases

5 Depths available from 13" to 22" to cover all refrigerated shelves
