

- ① Insert Gondola Upright SuperGrip® Sign Holder into gondola slots. Push down to lock in place.
- ② Position second sign holder according to the length of signage. Repeat step 1. (To remove sign holder, slide up and pull out.)
- ③ Insert signage into sign holder grippers.

- ④ Installation is complete.

NOTE: The upright brackets are compatible with a Lozier shelf; however, they are not “flush” against the opening. The white tabs will be visible and will appear to be pushing away from the bracket. The bracket does fit securely into the upright.
