

# EntryLink™

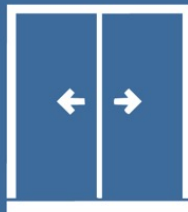

Managed-Access with Self-Service Shopping Experience

**EntryLink™** is a managed-access case solution that protects high-theft merchandise while preserving a smooth, self-service shopping experience. By allowing verified customers to unlock cases independently using their mobile phone, EntryLink™ reduces shrink without creating friction—or requiring associate involvement.

Designed for simplicity and cost efficiency, EntryLink™ is intuitive for shoppers and easy for store teams to manage. A single locking mechanism secures dual sliding doors, lowering hardware costs while delivering consistent, reliable protection. The result is a smarter approach to loss prevention that keeps products secure and shelves accessible.

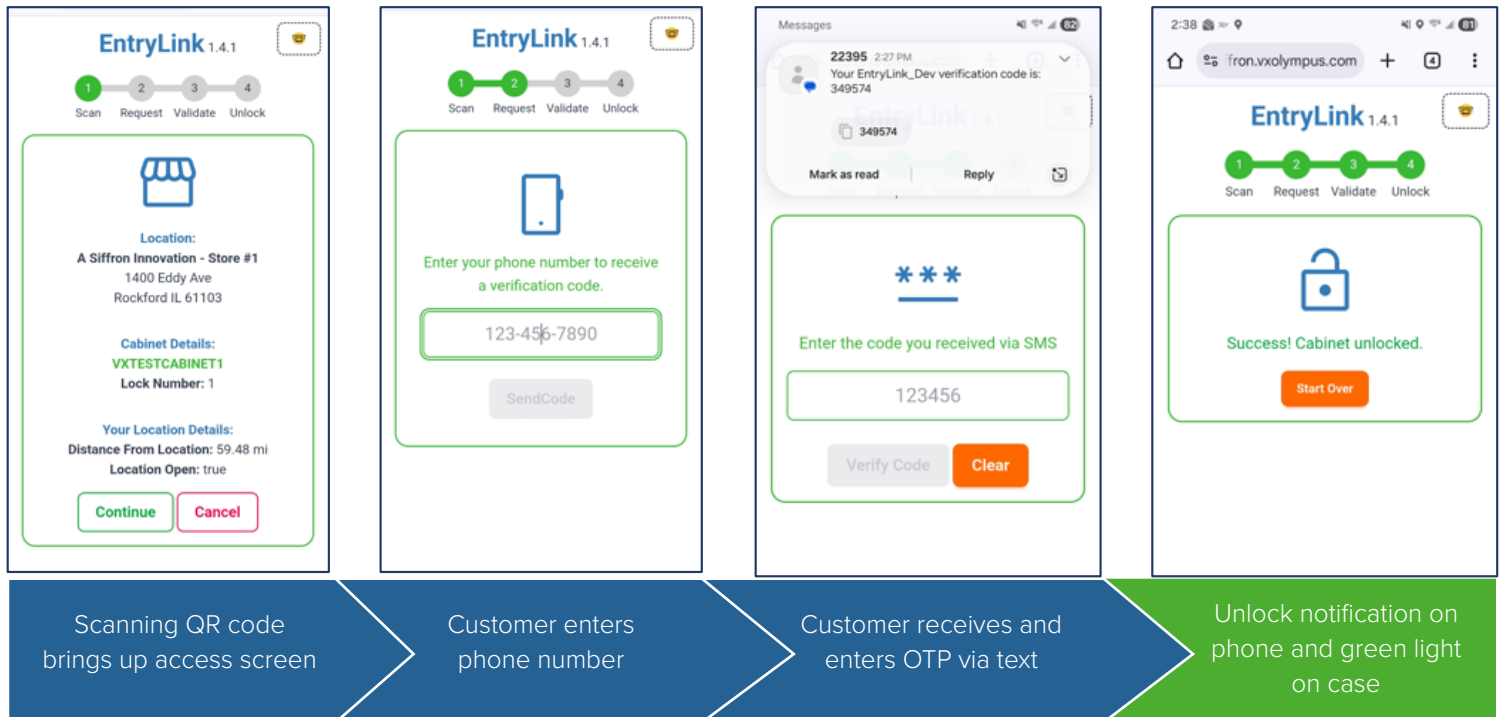

Simple access for customers without employee assistance

**Open the cabinet with your phone!**

-  Scan QR Code
-  Enter Mobile number when prompted
-  Enter code that is texted to you
-  Open cabinet door

## ◆ Frictionless customer self-access

Customers unlock cases independently via a simple mobile verification process—no associate assistance required.

## ◆ Ideal for high-theft categories

Secures vulnerable products while maintaining open, shopper-friendly merchandising.

## ◆ Simple, intuitive user experience

QR code entry, mobile number verification, and one-time passcode access minimize confusion and dwell time.

## ◆ Reduced labor and training requirements

Eliminates frequent associate unlocks and shortens onboarding for store teams.

## ◆ Dual-door efficiency

One locking system secures two sliding doors, reducing hardware costs and installation complexity.

## ◆ Real-time alerts and event visibility

Provides awareness of access activity for improved control and accountability.

## ◆ Cellular connectivity

Operates independently of store Wi-Fi, avoiding network impact or IT involvement.

## ◆ Built on proven sifftron security cases

Delivers durable, trusted performance in demanding retail environments.
