

Invisi-Shield™ Screen

Sweep protection that keeps products shoppable.

Stops the Sweep

Paired with a front fence or pusher system, the screen forces shoppers to use two hands, one to clear the fence and one to take a product, so items can't be swept off the shelf by the armful. Easy to shop one at a time, hard to steal in bulk.

Quick Installation

Installs in just 3-5 minutes per shelf using the Invisi-Shield "flipper nut," guide pins, and pushpins.

Full Product Visibility

Near-invisible clear polycarbonate keeps your packaging, branding, and facings completely shoppable. Protection customers barely notice.

Effortless Customer Use

Clear doors carry screen-printed instructions that guide shoppers through one-handed-at-a-time access, so there's no confusion at the shelf.

Pusher & Fence Compatible

Built to work with universal front fences and pusher systems, so you can add sweep protection to the merchandising setup you already run.

Broad Compatibility

Fits any standard 4' Lozier or Madix shelving system.
