

KeyLink™

Managed-Access Gates with Remote Unlock

KeyLink™ is a smart, managed-access locking solution that delivers reliable product protection without adding complexity to store operations. Designed for flexibility and fast deployment, KeyLink™ enables controlled customer access to secured merchandise while minimizing infrastructure, maintenance, and labor demands.

Using simple audible alerts and a Smart Key unlock process, KeyLink™ allows associates to assist customers quickly and remotely without disrupting store flow or requiring power at the shelf. The system scales easily across departments and locations, making it ideal for retailers seeking effective loss prevention with low operational overhead.

The Smart Lock Solution

Customer presses button to notify staff of desired case access.

**BEEP
BEEP**

KeyLink Puck, located up to 75' away, beeps alerting employee.

Employee taps RFID Key Card across the Puck.

Case unlocks with audible beep notification. Customer retrieves product and doors auto-close.
