

Invisi-Shield® System with Large Panels

Features and Benefits

- ◆ Larger size panels - 8" W x 8" H
- ◆ Other panel sizes include 3" and 4" widths in 3.5", 5.5", and 8" heights
- ◆ Optional End Closure Panel Kits available to prevent access from the sides of display shelves and protect product at the ends of the fixture
- ◆ High-impact clear polycarbonate panels will not break, even in high-traffic environments

Stop sweep on large, high-ticket merchandise

Protect high-theft products with the Invisi-Shield® System. The large tile design (8" W x 8" H) covers more shelf space and is perfect for protecting oversized merchandise. The sliding panels prevent "shelf sweeping" theft, while providing easy product access for legitimate customers. Crystal-clear "invisible" panels provide an unobstructed view for the consumer.

Invisi-Shield installs on the underside of standard retail shelving using the included hardware mounting kit. The Invisi-Shield System also features an audible ratcheting noise as the panels are moved to provide an additional deterrent.

Combine with Kwik-Set™ Pusher System for Added Security – Utilize the Kwik-Set™ pusher system to help maintain the product planogram and provide additional deterrence from product sweep. The full front fence and dividers of the Kwik-Set pusher restrict additional access points for shoplifters to defeat the system.

Specifications

Item No.	Description	Dimensions	Color	Pack
4604634901	Large Clear Invisi-Shield Panel	8" W x 8" H	Clear	5/bag*
