Tall Sliding Wire Security Gate

Features

- Secure and easy to use
- 48" W x 72" H gates
- Use in single section or side by side to secure mutiple gondolas worth of product
- Doors can be secured with padlock*

Convert Gondola Shelving into Lockable Display Cases with the New Tall Sliding Wire Security Gate.

Elevate your retail security with the Tall Sliding Wire Security Gate, expertly crafted to safeguard an entire 72" H x 48" W section of merchandise. Ideal for retailers looking to enhance protection against theft, this robust solution transforms your existing gondola shelving into a secure, lockable display case.
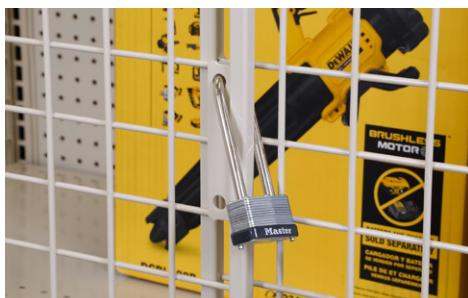

The Tall Sliding Wire Security Gate features durable wire grid grates. It includes all necessary mounting hardware for easy installation on standard Lozier or Madix shelving systems. For added security, optional side panels are available to close off the ends, preventing unauthorized side access and creating a comprehensive protective barrier.

Secure your merchandise effectively while maintaining easy access for store personnel and a seamless shopping experience for your customers.

*Padlock not included
