

# Security Bay Gates

Security Bay Bi-Fold Gate

Security Bay Swing Gate

## Features and Benefits

- ◆ Entire security system locks to ensure no shoplifters have access to product.
- ◆ Allows for the retailer to use their desired lock preference
- ◆ The bi-folding doors allow for minimal aisle violation (3' vs 1.5' when folded)
- ◆ The padlock assembly can fit a 5" or 2.5" crossbeam

## Safeguard Products from Show Floor to Warehouse

Retail theft is steadily on the rise. Some high dollar merchandise items require being kept under lock and key in warehouses or storage locations off the show floor until shopper are ready to purchase them. Pallet rack enclosures help to protect your pallet rack from theft, damage, or loss. Safeguard your pallet racking and backroom inventory with Security Bay Gates!

In these racking/bays, security gates are ideal for maintaining secure displays or closed storage. Retailers and store personnel can access merchandise at shopper's request while safeguarding the merchandise from potential shoplifters or other forms of shrink. Available in both Bi-Fold Security and Swing Out Gate.

**Security Bay Bi-Fold Gate (74" W x 69" H)** – Security Bay Bi-Fold Gates are ideal to use when aisle space between racking is tight. The bi-folding doors allow for minimal aisle violation (3' vs 1.5' when folded) – giving workers plenty of room and accessibility for stocking or retrieving items.

**Security Bay Swing Gate (60" W x 69" H)** – Security Bay Swing Gates are perfect for storage of larger equipment and merchandise in areas that contain more aisle space to allow for doors to fully open.

Racking gates are easy to setup and utilize. Wire grids install directly into racking universally (HD/Lowes/Menards Etc.) using provided mounting components.

**Note:** Bay widths must match the width of our units to ensure the swinging gates lock together. Padlock not included.

## Specifications

Item No.	Description	Dimensions	Color	Pack
