

Slide Mat Divider System

Features and Benefits

- ◆ Improve shelf organization and presentation
- ◆ Integrate shelving and dividers into standard display shelves
- ◆ Secures with included fasteners
- ◆ Includes front fence to retain product on the shelf

Simple and Versatile Shelf Divider System

Organizing shelf merchandise is critical to maintaining a clean store appearance. Products are easier for customers to find and price marking integrity is maintained.

The Slide Mat System is a simple solution for shelf organization. The gray, extruded mat features a grooved surface into which the dividers can be inserted. This method ensures the dividers will stay in place and have plenty of side support for the merchandise. The Front Fence is secured to the shelf perforations with included fasteners and provides an unobtrusive method of making sure products do not easily slide off the front of the shelf.

The low-profile construction of the system provides shelf organization with minimal interference of product packaging. Slide Mat is ideal for a wide array of product categories, and each kit contains three shelves worth of product organization.

Slide Mat Kit Includes:

- 3 Gray Slide Mats – 15.5" D x 48" L
- 3 Front Fences - 48" L x 1" H
- 50 Product Dividers – 1"
- 25 Dart Clips – for mounting Front Fence to shelf
