

Extendable Header System

Extendable Header System **installs directly into standard retail gondolas** without the need for any tools or additional mounting components.

Features and Benefits

- ◆ Kit includes left and right extendable header brackets, Christmas tree pins
- ◆ Easy to set-up – brackets install directly into gondola uprights without tools or fasteners
- ◆ Easy to adjust height – simple pin lock system (2" - 4")
- ◆ Easy to adjust depth – telescopes out using similar pin lock system (16" - 24")
- ◆ Re-useable

Adjustable Signage Display System for Gondola Uprights

The Extendable Header System is an adjustable sign holder system that gives retailers more flexibility in how they want their graphical promotions displayed by allowing for easy adjustment of sign height and depth. This new sign system installs directly into standard retail gondolas without the need for any tools.

To adjust sign height, simply press in the pin lock on each left and right bracket to set the height of the sign (between 2" and 4"). The system also features the ability to telescope out (16" – 24") as an aisle violator to further grab customer attention using a similar pin lock system.

A rigid sign graphic is recommended for use with the Extendable Header System. To install graphic, use included Christmas tree pins (8501224825) to pin graphic into front part of the Extendable Header Brackets. To replace, simply remove graphic and install a replacement with new pins. Graphic size and width can vary.

Push button adjustability every 2".
Vertical adjustment 18.25" to 24.25" H
Depth adjustment 16.25" to 21.2" D

Kit includes left and right extendable header brackets, Christmas tree pins
