

Yogurt Puller System

Features and Benefits

- ◆ Increase impulse buying with improved shelf management, segmentation, and product visibility
- ◆ Labor savings- easy to load and face products
- ◆ Simple design for better planogram adherence
- ◆ Tall cartridges for stacked product
- ◆ Four sizes available for multiple container sizes
- ◆ Paddle stays with the rear product to keep it from falling back

Keep yogurt displays organized, faced, and accessible

Single-serve yogurt packages are a high-consumption product. Without frequent restocking and upkeep, yogurt displays can quickly become chaotic and messy – leading to lost sales and potentially spoiled product. Enhance the shelf management and organization of yogurt sections with Siffron's Yogurt Puller System.

The Yogurt Puller System is an economical shelf management solution to face various types of yogurt packaging. The pullers come in a variety of sizes that accommodate popular yogurt brands to ensure retailers have an organized space that helps shoppers make their buying decisions. Each channel features an integrated puller for quick facing upkeep to keep merchandise organized and faced to the shelf edge.
