The inspiration behind our kinetic shelves

We find inspiration in everyday life. The more we pay attention to details around us, the more we discover. Remember gliding down, arms out, feet up, wanting more?

We used the same principle for our new gravity-feed Kinetic Shelf. The patented Kinetic Shelf is a low-friction, product-facing system that allows products to stay in motion and glide easily down a sloped surface, resulting in effortless accessibility.

Keep your inventory moving with the Kinetic Shelf.

PATENTED

Securely locked front fence keeps products in place

Extruded aluminum rail for shelf support and structure

Track allows divider placement every 1/16"

Product advantages

Features

- ◆ Showcases brands with self-facing shelving
- ◆ Features flexible shelf design
- ◆ Reduces labor costs
- ◆ Maximizes shelf space
- ◆ Provides easy installation and maintenance – no tools required

Self Facing

Keeping your products neatly organized and easily accessible can be a daunting task. Attract new shoppers and keep your inventory organized with the Kinetic Shelf's customizable and simple product-facing solution. The easy-to-install Kinetic Shelf's dividers insert into front and back slots anywhere along the length of the shelf. The Kinetic Shelf is designed to meet all standard retail shelf depths.

well adjusted

Kinetic Shelf

● Silicone-embedded shelf for maximum performance

● Easily adjustable dividers for optimizing planograms

Multiple depths or custom sizes available

Maximizing Space

Managing shelf space is critical for retailers to attract customers and to optimize profit. The Kinetic Shelf faces products with a minimal-to-no rise on the shelf, maximizing merchandising space. The Kinetic Shelf features adjustable shelf lanes so you can design the shelf space to your needs.

Product Flexibility

Looking for a cost effective way to manage products that are typically difficult to face and handle? The flexible Kinetic Shelf supports larger items that don't usually fit into shelf management systems – beating weaker traditional product pusher systems. The Kinetic Shelf easily faces a variety of product sizes with its ultra-slick surface for smooth, low-friction movement.

Kinetic Wire Shelf

Same infinite adjustability in dividers and depths as the extruded plastic Kinetic Shelf

get wired

Keep shelf areas organized and products accessible using the Kinetic Wire Shelf. The Kinetic Wire Shelf is a complete shelving system that handles heavy-duty products. Weight-tested to handle up to 100 pounds, the Kinetic Shelf can easily face products with the

7° angle standard needed to gravity-feed products. Flexible and durable, the Kinetic Wire Shelf's dividers quickly install along the shelf to adjust to the size of your merchandise. The Kinetic Wire Shelf installs in seconds and fits into standard gondola uprights with no mounting tools required.

Kinetic Shelf Pusher

Also compatible with the extruded plastic Kinetic Shelf

need a push

Regain valuable merchandising space and maximize profit with the all-in-one Kinetic Shelf pusher and divider. With the Kinetic Shelf pusher and divider, shelves don't need to be angled, but can be placed flat — which helps you get the most out of your retail space. Products easily glide forward without

being forcefully pushed forward like competitive pushers. The Kinetic Shelf's near-frictionless surface ensures merchandise stays properly faced and accessible to customers. You don't need additional mounting components or fasteners to install the Kinetic Shelf's pusher and divider. Simply insert the lightweight pusher and divider into the shelf where you'd like your merchandise set up.
