# Adjustable Vending Shelf

FFR-DSI's Adjustable Vending Shelf eliminates shelf sweeping with its metal lock-box construction. Knob turn releases a single package and alerts store personnel as multiple products are being dispensed. Keyed lock prevents pilfering from the system opening and the Barrier Wall drops down and protects back stock when door is open. System provides impeccable presentation on-shelf, easy installation and plan-o-gram resets, as well as significant loss prevention benefits. Locked shelf pulls out for efficient restocking.

## Features and Benefits

- Product remains accessible for self serve to customers.
- Easily identified purchase prior to removal.
- Data Strip® Label Holder keeps price/order tags below product.
- Eliminates shelf sweeping and deters shoplifting.
