Product Puller System & Shelf Overlay

FFR-DSI's Product Puller System & Shelf Overlay eliminates the hassles of stocking, stacking, and restocking for increased sales. Designed to fit any dairy case, its height efficient pull-out and pull tab features can increase labor savings as much as 50%. New product can easily be placed behind existing shelf stock providing first in, first out rotation. Once product is stocked, shelf easily rolls back and locks in place with product rotated, faced and ready to sell. The final result produces a "wall of product" effect, creating an inviting, easy to shop presentation.

Features and Benefits

- Keeps yogurt merchandised in a neat and orderly fashion.
- Helps guarantee first in, first out rotation for product freshness.
- Pebbled surface helps containers slide forward.
- Increased sales due to section always looking full.
- Clear dividers allow for full visibility of product.
- Dividers adjust to any product width.
- Shelf brackets are adjustable from side to side for easy installation in any case.
- Overlays with dividers and pull tabs available for top shelf.
