Shelf-Top SuperGrip® Sign Holder, Metal

Add flag signage in aisle with the Shelf-Top SuperGrip® Sign Holder, Metal, from FFR-DSI. Sign holder attaches to nearly any standard perforated shelf and features an integrated hinge that flexes when bumped for customer safety. SuperGrip® holding power ensures signage stays at eye level for maximum visual impact.

Features and Benefits

- Low profile beige metal plate attaches securely to any perforated shelf for a seamless look that doesn't interfere with product on shelf or most shelf management merchandising systems.
- Integrated hinge allows flag signage to swing left and right, ideal for high-traffic areas.
- Displays heavier signage in the premier "flag" position for maximum visual impact in aisle.
- SuperGrip® technology uses reverse-angle grippers to "clamp" onto signage for a secure fit.
- Two capacities hold material up to .100", or .100"-.250" thick.
- Use singly for high-impact promotional messages or together for eye-catching category banners.
